The incorrect syntaxon names were mentioned in the original article (Krestov et al. 2023). The association "Athyrio–Pinetum koraiensis (validated in this paper)" was indicated as a typical element for the alliance *Tilio amurensis–Pinion koraiensis*. However, this association was described under a different name: *Diplazio sibirici–Pinetum koraiensis* Kim ex Krestov, Dzizyurova et Korznikov 2023.

Here, we validate the alliance *Tilio amurensis–Pinion koraiensis* **all. nov., holotypus hoc loco** – *Diplazio sibirici–Pinetum koraiensis* Kim ex Krestov, Dzizyurova et Korznikov 2023 (Krestov et al. 2023), the full diagnosis is on page 121 in Krestov et al. (2006).

We also validate the order *Tilio amurensis–Pinetalia koraiensis* **ord. nov., holotypus hoc loco** – *Tilio amurensis–Pinion koraiensis* (validated above); the full diagnosis is on pages 117–118 in Krestov et al. (2006). We apologise for any confusion caused.
